

## Quality Cardiac Care

At Pallitus Health Partners, our mission is to improve our patient's quality of life. As heart disease progresses, the impact can be overwhelming and can affect one's quality of life. While cardiac disease cannot be cured, symptoms of the disease can be managed if closely monitored. That's where Pallitus Health comes in!

Our Heart Connection® program provides palliative care to individuals with cardiac disease by customizing a plan of care to fit the needs and goals of each patient. Care is provided wherever a patient calls home and in consultation with the patient's Cardiologist.

Emergency room visits and hospital re-admissions may be preventable with early detection and management of symptoms. Heart Connection® includes in-home and/or virtual visits by our specially trained team of Nurse Practitioners, Physicians and Social Workers. You'll receive 24/7 clinical support and care coordination to clarify treatment plans, medication regimens and other urgent issues along with our Symptom Management toolkit to help you stay in control of your cardiac disease.

### HEART CONNECTION® STATISTICS:

- Patients enrolled on average lived **3 times** as long as those not enrolled.
- Less than **2%** of enrolled patients needed to return to the hospital.

## Heart Connection®

# Specialized care for cardiac disease

# PALLITUS

HEALTH PARTNERS

## Could you benefit from our program?

- Have you been diagnosed with heart disease?
- Do you have a history of cardiac arrest?
- Are you suffering from chronic chest pain or angina?
- Are your heart medications no longer managing your symptoms?
- Are you having increased shortness of breath (more than you are used to)?
- Have you had frequent hospitalizations?
- Do you have unexplained weight gain or loss?
- Do you have multiple chronic illnesses, such as diabetes, lung disease, kidney disease or dementia?
- Have you received treatment for cardiac disease in the past but are no longer a candidate for further medical treatment?

## We're here for you.

If you answered **yes to one or more of the above**, we may be able to help. While there may not be a cure for heart disease, Pallitus Health Partners can help you manage your symptoms.

## Program services will include:

- Symptom management toolkit that includes: a symptom tracking journal, symptom identification tool, and help with monitoring edema (swelling)
- 24-hour access by phone to our expert clinical staff for questions and symptom management needs
- Optimized care to reduce or eliminate hospitalizations
- A specialized Care Team that includes Nurse Practitioners, Physicians and Social Worker
- Customized plan of care to fit your goals
- Ongoing education about cardiac disease
- In-home monitoring of related labs
- Collaboration between Pallitus Health Partners and the patient's primary care physician and specialist
- Invasive cardiac medications available in the home to manage crises (for eligible patients).

## Program goals

Goals for managing the symptoms of cardiac disease include:

- Reduce emergency department visits and hospital readmissions
- Manage cardiac symptoms wherever the patient calls home
- Increase patient and family understanding of cardiac disease treatment and prognosis
- Improve quality of life.

## You-centered care.

Pallitus Health Partners Heart Connection® program helps patients live longer and spend less time in the hospital.
